MERRY CHRISTMAS AND HAPPY NEW YEAR!

FIELD UPDATES!

It has been some time since our last newsletters, so let's get up to speed on what's been happening at the field.

This year has seen some major improvements to our field. Mid-year, we purchased a new lawn tractor. In July, we moved the metal awning from the west side of the main entrance, to just in front of the sheds. It is used for shade during the BBQ's and such.

Then in August, we installed 2 new tables that were built by Fred Omo, primarily to replace the 2

old rickety wooden tables. We move one of the older tables to the far east end of the table row.

Then in October, Concrete Industries donated time, equipment and materials to level the parking lot, dump gravel and smooth it out.

All of these projects were spear headed by members of the Club and have all improved our field tremendously.

And to celebrate our accomplishments, we purchased a new BBQ, to highlight our weekly get-together's.

DEC 4th, 2008 CLUB MEETING

The next regularly scheduled club meeting will be held this Thursday, December 4TH, 2008 at Binders Sign / FHRC. The meeting will begin at 7 pm SHARP!! Come out and get some RC ideas for Christmas! Raffle for a S.E.5a Slow Flyer 250 ARF by E-flite.

NEW YEAR'S DAY FIRST FLY!

It is tradition with the PropTwisters RC Club to fly on New Years Day. We don't know when this event actually started, probably for the need to do what others won't.

Every year there has been different weather.

One year, a snow-thrower was used to fight a losing battle trying to keep the snow off the runway. Other years it has been clear and cold. And with each passing year, we always have a good time, messing around, heating up coffee, hot chocolate, stew and donuts.

It's hard to predict what this year will bring, but it is guaranteed that someone will be out very early to get in the "First Fly of 2009", and the rest of us will be out around 10:00 to at least eat and drink something, and maybe fly.

If it works out, we may even be able to get Jim Jones (our resident BBQ king) to cook some breakfast on the grill!

See you Thursday, January 1, 2009.

Is this a full scale Pawnee? Or not?

FROG HOLLOW RC CLOSER THAN EVER!

For those of you who are concerned with your gas consumption (with your car), Frog Hollow RC is now only a few minutes from the field!

Now located at the corner of North College Ave. and Rose Street, Scott has acquired the old "Jerry's Bike Shop" building which is now housing his sign shop as well as the RC shop.

Scott says he is now able to carry more inventory for RC: planes, cars, heli, crafter items, building materials, kits and accessories.

He is also giving a discount to Club members so make sure you show your Club Card when making a purchase.

He is also placing special orders, so if you want something and don't want to order it yourself, give him a call. Joel Reynolds is also working at the shop. Call 525-4461.

Shop hours to satisfy any immediate cravings are: Monday-Friday (9-6), Saturday (11-5) and Sunday (12-4).

Winter Club Meetings are also being hosted by FHRC. The next meeting is this Thursday at 7:00 pm. SHARP!

Darrel Benedict's New Pawnee!

Purchased from FHRC, this Hanger 9 Pawnee is a beautiful airplane. Darrel has a Saito 80 Four Stoke nitro motor installed in the front and it purrs like a kitten. Darrel says it flies like a dream, and it looks great in the air.

Darrel is known for his eye for detail, so if you get a chance to view this plane up close, take the time to notice all the small details he has added to the realism of this plane.

As you can see from the photo, there are active flaps for slow flight during landing, a pilot,

POLES AND PLUGS AVAILABLE

It seems some of you have had a hard time securing certain plugs and poles that are used in the electric RC hobby. The Club currently has Anderson Power Poles and Zip Card available from Delbert Danly and Jim Jones.

The **Anderson Power Poles** which are used to connect speed controllers to the batteries are packaged in groups of 10 pairs or less. A bag of 10 costs \$15 or \$1.50 a pair. A pair is one red and one black housing with 2 connectors and 1 roll pin.

Anderson Powerpoles

The Zip Cord is 12 gauge wire attached in the middle used primarily for battery connections. It is red and black.

See Delbert or Jim at the field or call Delbert at 529-3179 or Jim at 240-0199 for questions or availability.

NEWS FROM TONY'S HOBBY

Tony's Hobby located on Highway 12 just north of Milton-Freewater, has now expanded the RC portion of his business to fill the complete front of his store. Going in the left front door, directs you to the RC Plane side of the shop. Tony is adding more vendors, more equipment, more electric planes, motors, ESC's, batteries, to his growing inventory of 'gotta-have-its'. The list of supplies continues to grow as hobbyists keep asking for new items they see in magazines, and as new items arrive.

Tony is giving an additional 10% off your purchase **IF you show him your current PropTwister Club Card.**

Visit his shop to browse through his inventory of new and newer items.

Club Members Swing Into Action!

Yes, there are rumors abound that club members only card about flying! Here is documented proof that club members are willing to idle there passion for waggling sticks. Here is a photo from a spy satellite showing members pitching in to install 2 new table at the field.

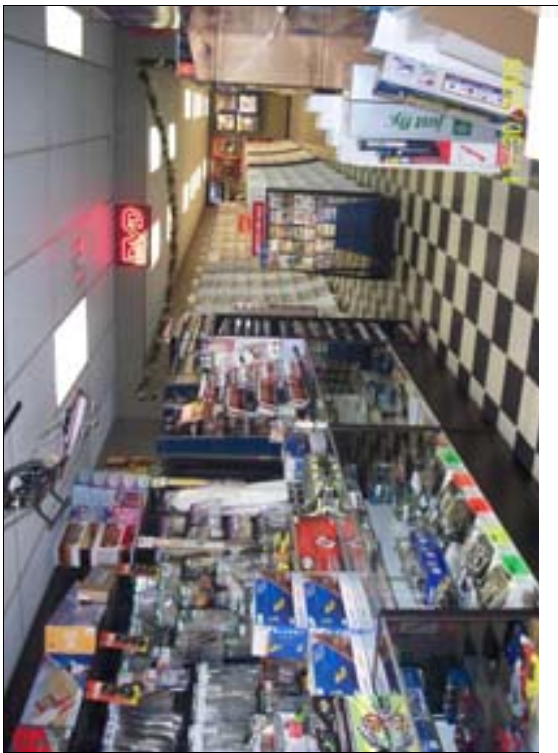

Delbert Danly's Big Eagle
This is a beautiful Christen Eagle. Powered by a Saito 180 Nitro Four Stroke, it is AWESOME!
